

This Time

Save your starry eyes for the big bang that made them

You're flying out away from me so far

This time

What is it this time?

What is it this time?

I love you

I'm just trying to love you

Starting out again

Well, I know how that feels

But you'll be back again if I know you

What is it this time?

What is it this time?

What is it this time?

I love you

I'm just trying to love you

Oh, you say you don't need me at all

Like you say nothing's wrong

Like you say you'd be better on your own

But you just keep hanging on

You say we'll still be friends

As if that's some consolation

But one day you gotta leave

If you're planning on coming back to me

What is it this time?

What is it this time?

What is it this time?

I love you

I'm just trying to love you

Won't you let me love you?
